Markup Assist makes generating SVG, WMF, and AI files much

faster. Draw freely and then take a snapshot of your drawing, using the context aware object snap tool. With a single click, export all your objects with their bounding boxes to one of these three formats, along with any vector objects. (video: 1:36 min.) A new tool called Markup Importer lets you import your uploaded files directly into your drawing. Use the tool to import logos, files, and images from your social media accounts. This allows you to use your social media accounts to upload files, so you

don't have to go back to your editor and re-upload your files after every change. (video: 1:20 min.) Display text with custom size, color, and shadow settings. (video: 1:15 min.) Create Shape Highlights for text to quickly identify it on a complex drawing. Click the shape highlight tool to create multiple shape highlights for multiple text objects. Then you can use keyboard shortcuts or create custom shape highlights to quickly and easily identify objects, even on complex drawings. (video: 1:18 min.) Create

your own shape highlight shapes, and dynamically display them based on object location and other contextual information. Design your own color, size, and transparency settings for your shape highlights. (video: 1:15 min.) Create your own icons for printing and exporting, with dynamic settings for printing size, color, and resolution. (video: 1:14 min.) Draw dynamically customized text boxes with optional rulers and margins. Enter a new value for the text box and use autocomplete to have a list of

common values suggested to you as you type. (video: 1:06 min.) Draw and design customizable, nested frames with a snap-to grid and multi-row and multi-column settings. Use the snap-to grid option to automatically generate grid lines for you, and use it as a guide for how to design and set up your frames. (video: 1:12 min.)
